|-------------------------------------------------------------|------------------------|
| •Graphic Era Hill University                                | 2023-present           |
| B.tech in Computer Science and Engineering                  | CGPA/Percentage: 8.76  |
| •Doon Presidency School                                     | 2023                   |
| 12 <sup>th</sup> ,Indian Certificate of Secondary Education | CGPA/Percentage: 93.4% |
| •Doon Presidency School                                     | 2021                   |
| 10 <sup>th</sup> ,Indian Certificate of Secondary Education | CGPA/Percentage: 90.2% |

CAREER OBJECTIVE

Committed to supporting efficient, secure, and scalable database solutions while gaining hands-on experience in enterprise-level data operations.

ACADEMIC PROJECTS

Shortest Route Optimization

Mar, 2025 -May,2025

- Designed and implemented a shortest path optimization system using Dijkstra’s algorithm to calculate efficient routes in weighted graph networks.
- Developed modular code in Python/C++ with adjacency list representation and priority queues to ensure optimal time complexity and scalability.
- Validated performance through test cases simulating real-world scenarios like traffic routing and network latency, achieving accurate and consistent results.

Movie Recommendation System

Jan, 2024 -Feb,2024

- Built a Python-based GUI movie recommendation system leveraging cosine similarity to suggest titles based on user preferences and content features.
- Utilized a Kaggle dataset containing movie metadata, cleaned and vectorized textual data for similarity computation using TF-IDF and Scikit-learn.
- Designed an intuitive interface with Tkinter to display personalized recommendations, enhancing user experience and demonstrating real-time filtering.

Bank Management System

Dec, 2023 - Jan2024

- Developed a GUI-based Bank Management System using Java Swing to handle core banking operations like account creation, transactions, and balance inquiries.
- Integrated MySQL database for secure data storage and retrieval, implementing JDBC for seamless backend connectivity and query execution.
- Implemented validation and access controls to ensure data integrity and user authentication, enhancing the system’s reliability and security.

TECHNICAL SKILLS

Languages: C, C++, Java, Python ,SQL  
Software: Git, Visual Stdio , Eclipse  
Tools and Technology: AWS, Versel, MongoDB  
Other Skills: Team-Collaboration, Group discussion, Leadership

CERTIFICATES

- AWS Cloud Operator
- DSA with Java (NPTEL)
- AWS Cloud Practitioner Badge
